

Courses to take Summer 2016 to reduce your course load or time to degree:

1. Complete any missing major prep courses (Math, Physics, Chemistry, Life Sciences)
2. C&EE M20 (same as MECH&AE M20) - Intro to Computer Programming with MATLAB.
Requisite: Mathematics 33A. This course is one of the two courses that can satisfy your computer programming requirement. You do not need to take this course if you already have credit for COM SCI 31.
3. EL ENGR 100 - Electrical and Electronic Circuits
Requisites: Mathematics 33A, 33B, Physics 1C. This course is a requisite for BIOENGR 120 (Biomedical Transducers), which you will be taking in the Winter.

Summer Advising:

- Attending orientation is recommended for all incoming students. Please visit the orientation website for details: www.newstudents.ucla.edu/transferstudents.htm
- If you are unable to attend orientation, you must sign up for email advising in order to enroll in courses for the fall quarter. Email orientation@seas.ucla.edu and notify us starting in mid-July that you cannot attend (include your name and UID).

Requisite Evaluations for Summer Enrollment:

1. For transfers from California Community Colleges: First check assist.org to see if the course you took at your community college meets the requisites for the UCLA summer course you are attempting to enroll in.
2. If you were unable to determine if you meet the requisite listed for the UCLA summer course, you may have your community college course or a course taken at another school evaluated. Email course_eval@seas.ucla.edu to initiate a course evaluation request. This process is only required if it's not clear on assist.org how the course transfers.
